Summary

I have been working as a full stack developer for 6 years and I have developed web projects with technologies such as **C# (.NET CORE)**, **Java (JSP)** and **Typescript (React/Node)**. I can manage the entire software development life cycle, from architectural design to deployment. I love to find creative ways to solve problems and I'm always looking to learn more and share information. Currently, I'm primarily focused on a remote opportunity to work with the **JavaScript** stack to develop innovative and user-friendly web applications.

Work Experience

Full Stack Developer at Grupo Matsuda - January 2016 - Present - 7 yr 8 mos

Álvares Machado, São Paulo, Brazil

Working in the real estate development department, developing a land reservation system with digital model of the property and integration with the ERP TOTVS RM, developed with **React**, **Typescript**, **Ant Design**, **NodeJS**, **Prisma ORM**, **PostgreSQL**, **Docker**, **Socket.io**, **Pentaho (ETL)**, **Git** for versioning, **Jest** for automated tests, **Terraform** and **AWS** for hosting and **PWA (mobile)**. Resulting in improvement on productivity, security and user experience of the reservation process for over a 300 users.

Developing internal tools to provide meaningful and insightful reports integrated with the ERP TOTVS RM, developed with **C# .NET CORE**, **T-SQL**, **BootStrap**, **JavaScript** and **Git** for versioning. Resulting in relevant improvement on the decision-making of the managers.
